

Third-Party Integration Access Level

Trustpages CRM and Slack integrations enables you to be notified when a trust center visitor requests access to a Requestable Resource. This will notify your team - either within Slack or within your CRM - with a link to approve the request in your trust center. You can also be notified when one of your private or requestable Resources has been accessed.

When setting up these integrations in your account, you will be requested to grant the Trustpage application access to your Slack or CRM account. Here is an overview of the access needed to enable these integrations:

Slack

This app was created by a member of your workspace, Trustpage.

Trustpage is requesting permission to access the Trustpage Slack workspace

What will Trustpage be able to view?

-  **Content and info about you** ▼
View information about your identity
